 +130 lbs • 5'1"  +150 lbs • 5'5"	
Males	112 Days
Females 16-22 Years Old	Not Eligible
Females 23 or Older	112 Days

Platelet Eligibility Timelines	
16+ male age	18+ female age
 minimum 120 lbs	
Males	2 Weeks
Females 16-22 Years Old	180 Days
Females 23 or Older	2 Weeks

Prior to donation, all potential donors must register with LifeServe Blood center and provide a form of identification printed with their name (e.g., driver's license, social security card, credit card, etc.)

Age

Donors must be at least 16 years or older. If first-time donors are 16- or 17-years-old, they must have a signed LifeServe Blood Center parent/guardian permission form.

Alcohol

Permissible if not under the influence at the time of donation.

Antibiotics

Donors should not donate if currently taking for an infection.

Cancer

Donors with certain skin and/or cervical cancer may donate three days after treatment. Donors with other types of Cancer may donate after one year of diagnosis if asymptomatic. Donors who have had the following types of cancer are not allowed to donate: Hodgkin's disease, leukemia, lymphoma, melanoma, multiple myeloma, mycosis fungoides.

Cold

You should not donate if you have a cold on the day of donation.

Diabetes

OK if well controlled by diet and medications. Insulin is OK as long as it was not beef insulin (bovine) from the United Kingdom and not taken since 1980.

Drugs/Medicines

Some medications may be fine for blood donation. At the time of donation, donors will need to provide names of medications that are currently being taken or previously been taken.

Epilepsy/Convulsions/Seizures

OK if seizure-free for six months.

For specific questions regarding donation eligibility, call 800.287.4903, ext. 4876 or email nurse@lifeservebloodcenter.org.

Heart problems or heart surgery (now or in the past)

Some heart conditions are acceptable for blood donation and others may not be.

Infections

Donors should not donate with an infection or if currently taking medication prescribed for an infection.

Piercing Ear/Skin

OK if performed with single-use, sterile instruments and equipment.

Pregnancy

OK six weeks after pregnancy ends. Breastfeeding is not a cause for deferral.

Vaccine

Some vaccinations may be fine for blood donation. At the time of donation, donors will need to provide names of vaccines received in the last eight weeks.

Tattoos

OK if performed in a facility licensed to apply tattoos in the state of: Iowa, Alabama, Alaska, Arkansas, Arizona, California, Colorado, Delaware, Florida, Hawaii, Illinois, Indiana, Kansas, Kentucky, Louisiana, Maine, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, New Jersey, North Carolina, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Vermont, Virginia, West Virginia, Washington or Wisconsin.

Travel

Some places of travel outside of the United States may lead to donation deferral. Donors will be required to provide specific locations as well and duration of stay and dates of return to determine donation eligibility.

Weight

Maximum weight allowed is 350 pounds on our bloodmobile vehicles, 400 pounds at a donor center location and 500 pounds at on-site mobile blood drives.
