

Have you been diagnosed with COVID-19 and fully recovered?

If yes, **YOU** can **save lives** by donating convalescent plasma to **help treat patients** who are critically ill with COVID-19!

Donate Convalescent Plasma to Help Treat COVID-19 Patients

What is Convalescent Plasma?

Convalescent plasma (CCP) is the liquid portion of your blood that is rich in antibodies that are used to treat or prevent serious infection. If you were confirmed to have COVID-19, your body may be producing specific COVID-19 antibodies.

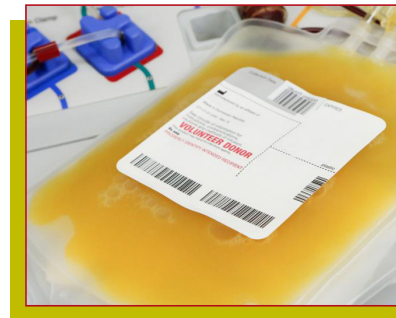

Who's eligible?

To be considered for this special donor program, the following criteria must be met:

- A.** Have a confirmed positive molecular test (PCR) for infection with SARS-CoV-2 and provide either a completed physician referral form or proof of a positive test
- Have fully recovered from COVID-19 and have been symptom free for more than 14 days.

- OR -

- B.** Have received a COVID-19 diagnosis from your physician without a positive test or had symptoms indicative of COVID-19
- Antibody testing may be performed for CCP program qualification.
 - Have fully recovered from COVID-19 and have been symptom free for more than 14 days.

Believe you may qualify to become a CCP donor?

Complete a pre-assessment qualification form located at www.lifesevebloodcenter.org to see if you meet all the criteria required for this special donation. It is important to note that in addition to the requirements listed above, all donors must all meet general blood donation criteria.
